Hiring Team
Samlink
Espoo/Jyväskylä

Dear Hiring Team,

I'm excited to contribute to your cloud-based solutions and thrive in Kyndryl 's collaborative and innovative environment. With five years of experience designing high-performance distributed systems, I offer the following expertise:

- **Java/Spring Boot & Cloud Native Development**: Built microservices on Kubernetes, leading the deployment of scalable clusters that support high-concurrency device access.
- **Low-latency Systems Experience**: Hands-on with Aeron, RocketMQ, and Thrift; developed message storage and replay systems for real-time financial data processing.
- **Agile & DevOps Practices**: Proficient in CI/CD pipelines, containerization, and managing multi-version deployments across environments.

I am passionate about building resilient and scalable systems that perform under pressure. I believe Samlink offers the perfect platform to apply my technical background while growing alongside a talented team solving impactful challenges.

Thank you for considering my application. I would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,
Weilai Wang
